CONNECTED OPERATIONS
A BRIGHTER TOMORROW

Mappin

MAP OPERATE ACHIEVE

Information in context. Action in the field.

From fragmented information to connected fieldwork

Scattered files, messages, photos and memory become one organised operational record that teams can actually use.

Water · Utilities · Estates · Agriculture · Facilities · Golf

CONNECTED OPERATIONS
A BRIGHTER TOMORROW

Mappin

MAP OPERATE ACHIEVE

One asset. One complete record.

Every pin can hold the location, photos, notes, condition, history and linked files that give the asset real meaning.

More context. Better decisions.

Location

Valve Chamber VC-0173

Lat -36.8482, Long 174.7631

East Field, Zone 3

From the field to a smarter tomorrow

1 Plan

Create work, assign teams and prepare for the field.

- Create work orders
- Plan survey areas
- Assign team members

2 Map

Capture accurate data in the field with the Mappin mobile app.

- Collect assets and features
- Add photos and notes
- Work offline, sync in real time

3 Manage

Review, validate and keep work on track in real time.

- View captured data
- Track progress by team
- Keep records up to date

4 Report

Generate professional reports and share with stakeholders.

- Create PDF reports
- Include maps and photos
- Share with your team

1. First capture
- 12 Jan 2024

Asset captured in the field and added to Mappin with location, photos and key details.

2. Inspection
- 3 Apr 2024

Follow-up inspection added with condition notes, new photos and updated status.

3. Maintenance
- 18 Aug 2024

Work completed and documents attached. Asset status updated to operational.

4. Review / Handover
- 10 Feb 2025

Asset reviewed as part of annual audit. Full history available for handover and planning.

Mappin

MAP OPERATE ACHIEVE

Dependable by design

Structured records, audit history, photo evidence and dependable syncing help teams trust what they are seeing.

Reliable data — Confident teams — Less risk — Better decisions

BUILT FOR A WIDE RANGE OF INDUSTRIES

Water · Utilities · Estates · Agriculture · Facilities · Golf

Sync across devices

Changes sync in real time and work continues offline when you're out of signal.

- Devices synced
- Pending changes 0
- Last sync 2 mins ago

Structured records

Consistent fields, forms and asset hierarchies keep data clean and searchable.

- Standardised fields
- Linked to assets
- Validation rules
- Complete records

Trust turns data into progress

Offline capture

Record data, photos and inspections in the field. Auto-sync when back online.

- Offline mode
- Data saved locally
- Photos queued
- Auto-sync enabled

Audit trail

Every change is tracked with who, what, when and where.

- User activity logged
- Before & after view
- Time and location
- Exportable history

Protected photos

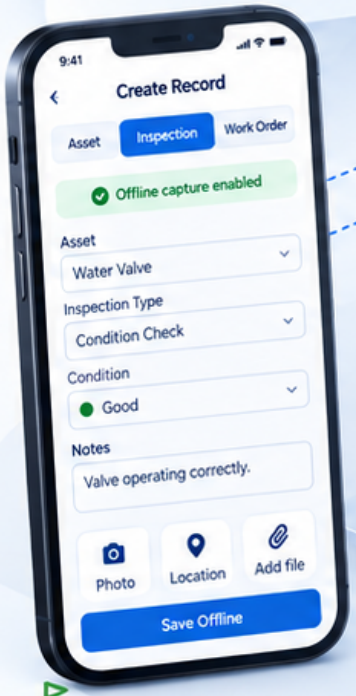

Photos are time-stamped, location-tagged and linked to the right asset.

- GPS location
- Time & date
- Assets linked
- Secure storage

Duplicate control

Smart checks prevent duplicate assets and keep data accurate.

- Automatic checks
- Match suggestions
- Merge or review
- Cleaner datasets

SYNCHRONISED. PROTECTED. ALWAYS RELIABLE.
